New Touch Screen Web Guide Control

*The new EVO 150 web guide control is now available with a touch screen.*

(Madison, Wis.) – The new EVO 150 web guide controller is now available with a lighted touch screen operator panel. The touch screen displays intuitive icons for controlling basic web guide functions. The 24 VDC controller features 150 watts of power with the ability to control brushed and brushless actuator motors – all in a compact enclosure. EtherNet/IP, PROFINET and discrete IO communication protocols allow easy integration with existing PLC controls. The integrated web interface allows convenient uploading and downloading of guide system settings and performance parameters. The control module itself can also be DIN rail mounted in an existing control panel. The EVO 150 is compatible with most existing AccuWeb web guide systems.
